MIGNONLIBRA

Extremely Precise, with a dose consistency of 0.1 – 0.15 grams, to always achieve the expected result in cup and minimize the coffee waste.

Super Quick, able to weigh the grind coffee into portafilter while grinding in real time

Easy to use, thanks to the intuitive touch display which allows:

- / To easily set the quantity for both single and double shot;
- / To grind by weight even in continuous mode;
- / To switch from single to double (and viceversa) during the grinding process, without any coffee waste;

Hands-Free metallic fork, extremely fast to adjust manually without any additional tool, allows to use the weighing Technology with any type of portafilter.

55 mm flat burrs for an **extremely high productivity**
1.4 - 1.8 g/s (Espresso).

Stepless Micrometric Regulation System (Patented) with infinite adjustment points to grant incomparable setting precision.

Extra Comfort regulation Knob: for a more comfortable experience.

Anticlumps & Electrostaticy System to ensure a high dose consistency and a counter always clean.

Silent Technology: (around 64 dB) to provide a pleasant and quite grind experience at any time of the day.

Mignon Libra is suitable even for **extra-large shot** (>16 grams) thanks to the **dedicated dosing funnel** (available as optional).
