Comparative particle size distribution in espresso grind setting

- Espresso Specialty Black
Pronounced peak of the fines grants good body while providing an excellent clarity emphasising even the most delicate flavours.
- Italian Espresso Taste Black
Wide particle distribution with a moderate concentration of super fines, resulting in an excellent body and good flavours clarity.
- All Purpose Black (Espresso)
Two extremely pronounced peaks providing an excellent body and balance, as well as a very good clarity.
- High Performance Black

Comparative particle size distribution for All Purpose Black

- All Purpose Black (Espresso)
- All Purpose Black (Filter)
Extremely pronounced peaks, two in espresso (with minimal presence of intermediate particles), one in filter, show great grind uniformity and versatility.
